伊豆諸島

伊豆諸島は、概して海岸線が切り立っています。湾の入り 込みも少なく、加えて風波の強い特有の気象条件下にあるた め、港湾の整備も技術面・コスト面ともに、困難な問題を多 く抱えています。この厳しい自然環境が、島の発展の大きな 障害となっています。

昭和28年、離島の後進性を克服し、産業の振興と生活の 安定・向上を図るため、離島振興法が制定されました。以降、 港湾・漁港・空港・海岸の整備が計画的に着々と進められて います。

現在、本土からの大型定期船が接岸できる港は、8島15 港(港湾10、漁港5)になっています。また、都営空港は 5島5空港となっています。

The Izu Islands are constantly buffeted by storms and their sheer shorelines leave scant room for shelter. Providing for port facilities under such distinctive conditions has been accomplished only with an ample measure of adversity, both in terms of technology and cost. Growth in the islands has also been seriously hindered by the severity of the natural environment.

Seeking to keep the advancement of isolated islands in line with that of the rest of the nation, the Solitary Islands Development Act was enacted in 1953 to encourage industry and stabilize and improve living conditions. Consequently, a steady expansion is being undertaken as plans are drawn up for the development of ports, fishing ports, airports and shorelines.

At present, there are 15 harbors (10 ports, 5 fishing ports) on eight of the islands that can accommodate large-size vessels from the mainland. In addition, Tokyo Metropolitan Government also operates five airports on five of the islands.

Tokyo Metropolitan Government took over the management of the Chofu Aerodrome from the national government in July 1992. Its development as a public airport under Civil Aeronautics Act was completed and operations were launched in March 2001 as the TMG Chofu Aerodrome.

The Aerodrome is a commuter transportation base for flights to Oshima, Niijima, Kozushima and Miyakejima, while also functioning as a base for various other aerial work services such as aerial surveying.

In addition, it serves a base for disaster relief acts and transport of emergency relief supplies.
