Tokyo Waterfront City

Advanced Environmental city embraced by water and greenery
that dispatches various information and culture to the world

“Tokyo Waterfront City”, a large project carried out in
Tokyo Port, has evolved as a center for enhancing
vitality and attractiveness of Tokyo and also as a city of
exchange open to the world by integrating various urban
functions such as business, commerce and residence in a
beautiful open space on the waterfront.
The City is a planned site of the Olympic Village for
Tokyo 2016 Olympic and Paralympic Games which
Tokyo Metropolitan Government is seeking to host.
Also with “Umi-no-Mori” (Sea Forest) developed in the
vicinity, it will continue to play an important role as a
city that displays diverse characteristics.
Currently, Tokyo Waterfront City has entered a phase of
completion. It is aiming to evolve as a sightseeing spot
that can attract many international visitors and also as an
advanced environmental city and a center that transmits
culture
